

CHRISTENER LEIGH

ABOUT ME

I am a new web developer seeking challenges to advance my skills in a dynamic tech environment. I bring a proactive approach with keen attention to detail, great organisational and communication skills. I am a collaborative team player who can also thrive independently. No matter the project I am committed to delivering high-quality work and ensuring user satisfaction.

SKILLS

HTML | CSS | JavaScript | React | Git | GitHub | Node.js | SQL | Playwright | Jest

CODING EXPERIENCE

Web developer, 09/2023 to present

School of Code, Online

- **Mid-week project.** "Bootcamp Kitchen" was a team initiative project aimed at encouraging healthy eating among bootcamp participants. Our six-member team began with an ideation phase, forming a collective approach and a team manifesto emphasizing unity in decision-making. We identified our project's core challenge and proceeded with designing the website, developing both low and high-fidelity wireframes. My technical contributions included implementing CRUD functions in the backend using ElephantSQL for data management. For the frontend, we employed HTML, CSS, JS, and Bootstrap to ensure an adaptive and smooth user interface. We also did testing using Playwright and Vitest, ensuring the platform's functionality and accessibility across different devices.
- **Four-week project.** I am currently working on a dashboard for the School of Code. What I have done so far can be found on my GitHub page. More information to come once we have completed it.
- **Portfolio.** I am working on creating a portfolio which shows both my personality and progress in my coding skills. To complete this I have used Vanilla HTML, CSS, and JavaScript.
- **Extra projects.** Outside of the School Of Code, I created a Rock, Paper, Scissors game, and a replica of the YouTube homepage to practice my HTML, CSS, and JavaScript skills. I have also created a
